## Notes & Safety (READ BEFORE USING)

- All entries on previous pages are FICTITIONAL and marked clearly as TEST/FAKE.
- Do NOT use this data for any live authentication, financial transactions, or official purposes.
- IP addresses used are from documentation/test ranges (per RFC 5737) and are non-routable.
- Credit card numbers shown are widely used TEST card numbers and will not work for real payments.
- For realistic-but-safe test data that will pass format validation, consider using dedicated test services (e.g., Stripe, PayPal sandbox, or synthetic data generators that explicitly avoid real assignments).
- If you need a different layout, more profiles, or CSV/JSON export for test automation, tell me and I can generate those (still keeping data fictional/test-only).
